

GENESEE FINGER LAKES REGION COMPREHENSIVE CLIMATE ACTION PLAN

What is a Comprehensive Climate Action Plan?

Building off the Priority Climate Action Plan, which was developed in early 2024 and focused on reducing greenhouse gas emissions in three sectors (Municipal Operations, Transportation, and Buildings), the Genesee-Finger Lakes Regional Planning Commission is undertaking the development of a Comprehensive Climate Action Plan for the nine-County Genesee-Finger Lakes region (Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates). This Comprehensive Plan will collaboratively define goals and strategies to reduce regional greenhouse gas emissions and climate pollution across all sectors.

Why do we need a Comprehensive Climate Action Plan?

The Genesee-Finger Lakes Region is already experiencing impacts from climate change — such as more intense and frequent rain events, flooding, drought, and extreme heat — all of which pose a threat to public health, infrastructure, and the region's economy. The development of a Comprehensive Climate Action Plan will help the Genesee-Finger Lakes region:

- Tackle damaging climate pollution while supporting the creation of good jobs and lowering energy costs for families;
- Accelerate work to address environmental injustice and empowering community-driven solutions in neighborhoods disproportionately impacted by the impacts of climate change and climate pollution; and
- Deliver cleaner air by reducing harmful air pollution in places where people live, work, play, and go to school.

How do I get involved & provide input?

Public input is essential to the Comprehensive Climate Action Plan and will play a central role in developing the goals and prioritizing the strategies identified in the plan. Please take our survey to help us understand the community's support for different types of climate action.

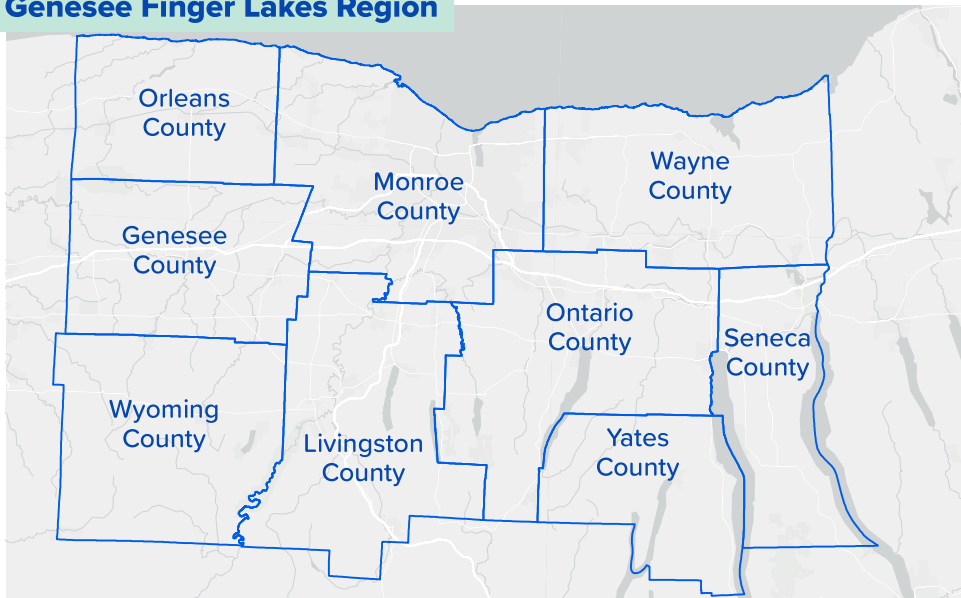

To stay involved, you can sign up for project updates at engage.gflrpc.org – you'll be notified of upcoming public participation opportunities, such as surveys and public meetings, and when a draft of the Comprehensive Climate Action Plan is ready for review!
