

TOWN OF BYRON SEWER DISTRICT NEWS
MAY 2024

When pumping and cleaning the districts septic tanks some residents are flushing non-decomposing material into their septic tanks. **DO NOT** flush wipes, grease, women hygiene products or non-dissolving material into septic tank.

When district users call to report a flushing problem, the line in and from the house to the tank is plugged 99% of the time because of these products being flushed into the system. It is the homeowner's responsibility to maintain this line, not the Sewer Department. We will try and assist with the problem, but the homeowner should **CHECK** their line **FIRST** before calling.

Do it early and please **DO NOT** wait until the nights or weekends, when getting a timely response might not happen after hours to locate personnel.

SCHEDULE OF TANK PUMPING

On a four- year rotation

Summer Months

2025- South Byron
